C	<div><div></div></div>	Python	<div><div></div></div>
Spring Boot	<div><div></div></div>		

Projects

Vent Out, Single Page Application [↗](#)

This is a single-page web application built with Angular as the Front end, Node as the back-end. Cloud MongoDB is used to store the application data.

This application is designed to take anonymous feedback from our friends, colleagues, etc. Without even creating an account we can take feedbacks and give feedback to others. Used Socket.io for listening to feedbacks incoming. So, without any manual refreshes, we can see the feedbacks we got. All we need to do is sharing the feedback link with the people.

Kanban Boards [↗](#)

Kanban Boards is a Single page web application. We can manage all of our action items in one place and update their statuses accordingly. It uses browser local storage. So, the task data will persist even after closing the application.

Online Assessment Portal

Online Assessment Portal is a modern single-page web application built using React as the front end and Java Spring Boot as the backend. Cloud MongoDB is used to store the application data.

This web application is designed for taking up exams online. Faculty can create exams and students can take up those exams. After an exam, the result will be computed and shown to the student without any further delays. It prevents students from copying while taking assessments by listening to user events while taking exams.

Professional Experience

Assistant System Engineer - Trainee, Tata Consultancy Services

09/2020 – present

Currently working as Front End Developer in an Insurance project. Effectively communicated and collaborated with Senior Developers for the feature development.

Worked with various departments Like Backend, Quality assurance, and Testing for debugging issues.

Software Development Engineer-Intern,

12/2018 – 03/2019

LOG Security Innovations Private Limited [↗](#)

Assisted on an android application for the startup called LifeOfGirl.

Extensively worked on Location services, Google maps, Material design, Firebase cloud messaging in android.

Appreciations

Tech-i-Evolve 2020 [↗](#)

Appreciation from Project team [↗](#)

Organisations

NSS, Crowd Control Volunteer at Gandi Festival

Interests

- Gaming
- Movies
- Travelling

Courses

Java Full Stack with Spring Boot and React

certification 

Data Structures and Algorithms: Deep Dive Using Java

Certification 

Languages

- English
- Telugu
- Hindi
- Tamil
